**A** 5B Warwick Close

### OBJECTIVE

I am looking for employment with a company where I can develop my skills and grow personally and professionally. I want to improve my software developing skills so that I can one day create applications that will be used everywhere.

### PROJECTS

#### University Projects:

- Developed web applications as part of university projects
- Contribute to the creation of databases structures and management.
- We used collaborating tools like GitHub when doing our projects.
- Developed a mobile application for android that kept track of user's expenses and ensures that they didn't spend over their budget.

### WORK EXPERIENCE

#### CSG – Software Engineer Intern

01 July 2024 – 31 December 2024

#### Duties

- Developed backend APIs using Java and built new web pages for the company's application using Angular.
- I used Azure DevOps to create pull requests and participated in code reviews with my mentors.
- I participated in daily stand-up meetings with my team to discuss progress, address issues and plan the next task.
- Used Ubuntu to start up and manage Docker containers.
